

How To Tie a Lanyard Knot

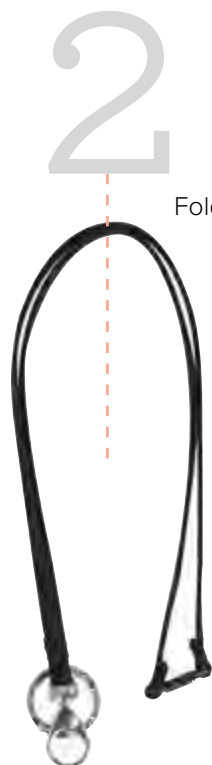

tie all lanyards this way (any style of lanyard)

vera bradley

1

Pull ALL paper and plastic off the lanyard and lay it out straight with the lobster claw hardware face up.

2

Fold in half.

3

Halfway down, fold it over again to form a loop, with the end of the lanyard tucked under and to the left.

4

Bring the end of the lanyard back around to the front, inserting it through the loop.

5

Pull each end to secure the knot in place and you are done!
